INDUSTRY EXPERIENCE

- 2021** Portfolio
I have curated and designed my own website featuring my works that act as my portfolio. I've created it from scratch from a front-end framework using **Bootstrap**.
- 2022** Linktree clone
Static website created using HTML, CSS and JavaScript from scratch. Mirroring the function of popular linktree but with **vanilla JS**.
- 2022** Movie Time
A Movie reservation system created for my college project using **Django** and **MySQL** as database.
- 2022** Rayso-API
Provides ray.so as a REST API version. Make beautiful and prettified code screenshots. Made using **Node JS** and **Express**.
- 2023** Weather-app
A simple weather app made using **Angular JS** and **TypeScript**.

ABOUT ME

A computer science student who loves making both front-end and backend projects. I have a solid knowledge and understanding of different technologies used to make modern applications. I have previously used famous frameworks like **React**, **Angular**, **Django**, **Fast API** etc. I have prior experience using both SQL (**MySQL**, **PostgreSQL**) and NoSQL (**Mongo DB**, **Redis**). My passion is driven by open-source contributions. Other than programming I love to listen to music.
